

Assignment-2

Task-1: Conditional Tags

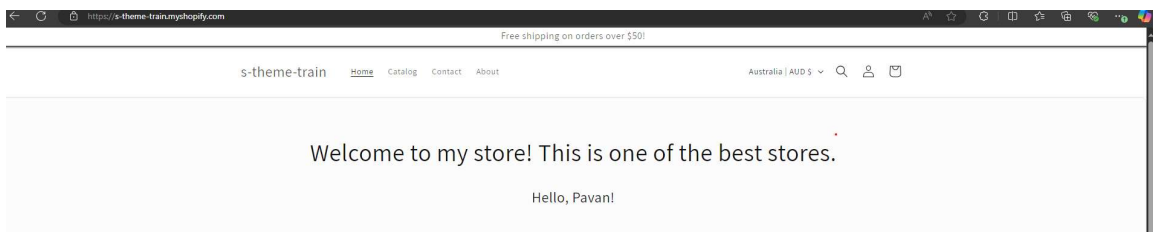

Displayed a message on the homepage based on the customer's login status

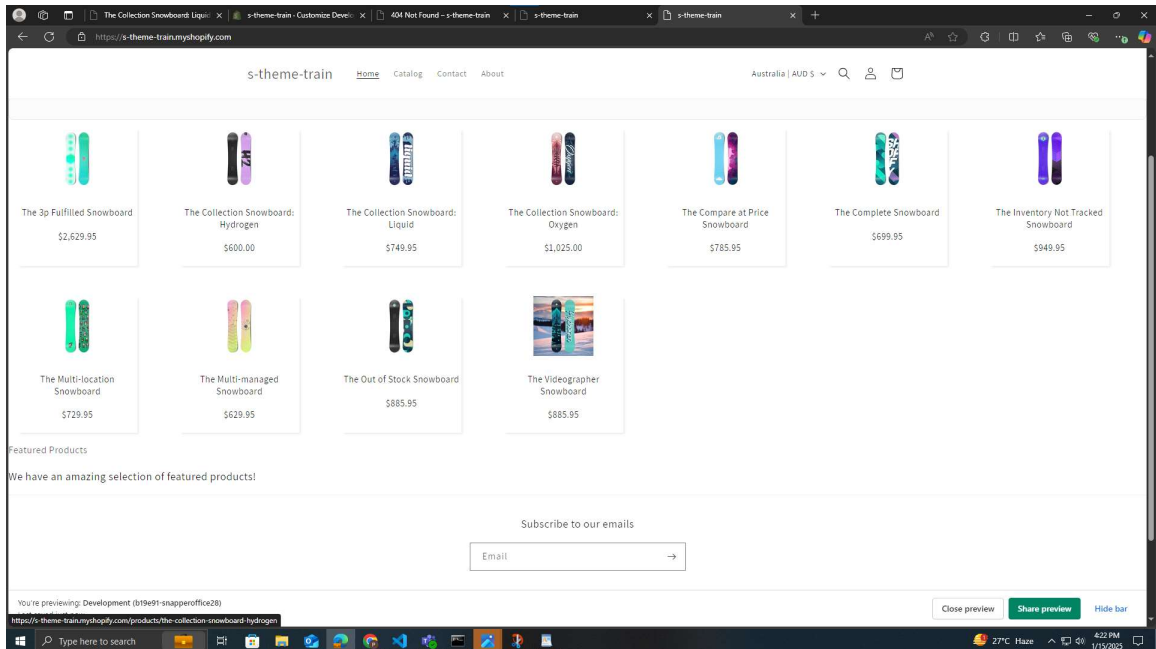

If the customer is logged in, displayed: "Welcome back, {{ customer.first_name }}"

Otherwise, displayed: "Welcome! Please log in to explore more."

Task-2: HTML Embedding with Liquid

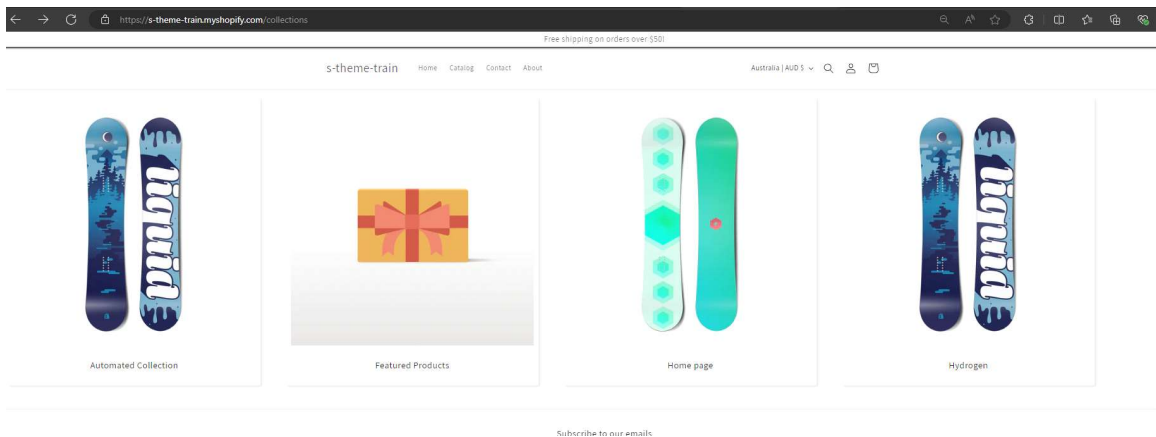

Added a dynamic announcement bar at the top of your store with the message: "Free shipping on orders over \$50!"

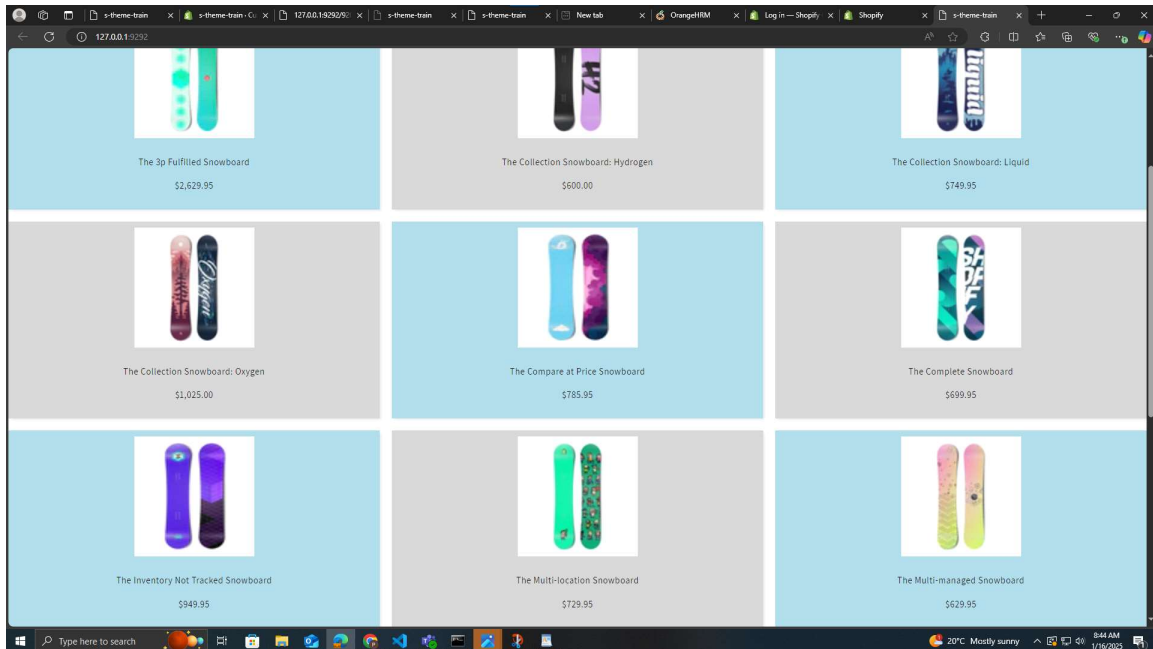

Created a featured section on the homepage with product images, titles, and prices dynamically pulled from the "Featured Products" collection.

Task-3: Iteration Tags

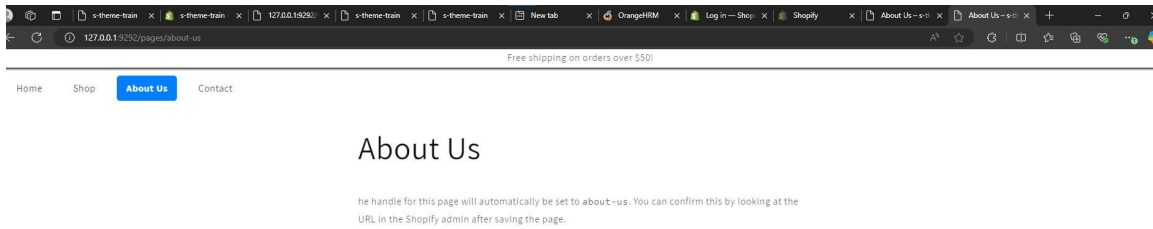

Rendered all the collections in the store and displayed them on separate collection page using `{% for %}` tag.

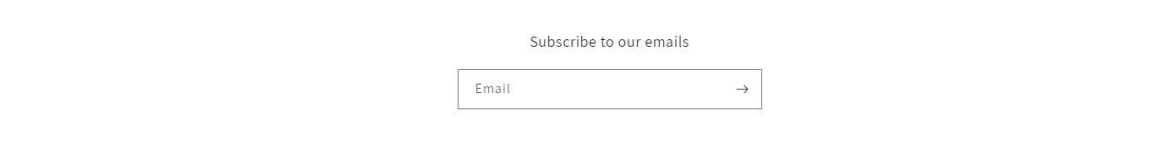

Rendered the products in product page in grid layout with alternate background color for two adjacent products items using `{% cycle %}` tag.

Task-4: Liquid Syntax

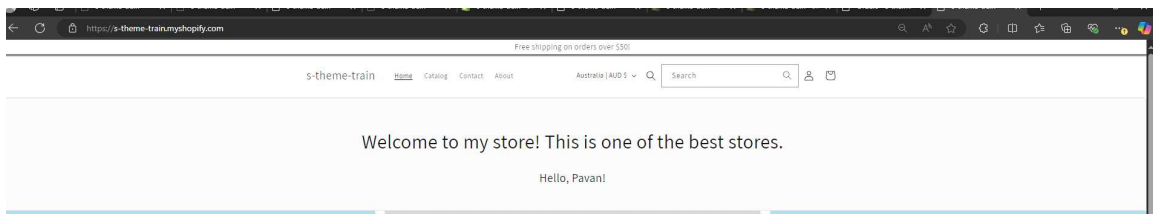

Created a navbar such that current page element is different from other.

Task 5: Theme Tags

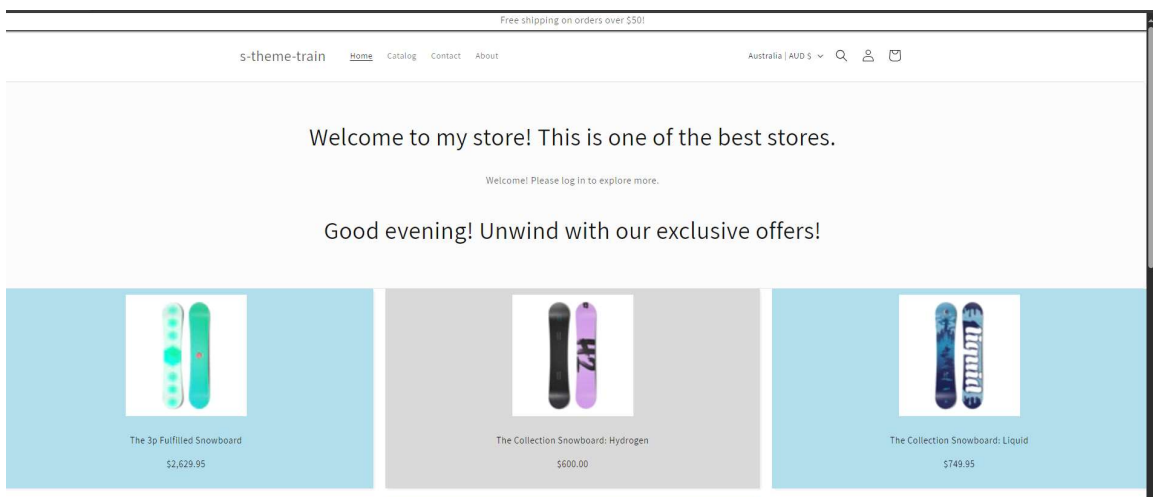

Created a form in footer using `{% form %}` tag to signup for newsletter

created a search bar using {% search %} tag

Task 6: Variable Manipulation

Assigned and used a variable to create a custom greeting message based on the time of day:

Morning: "Good morning! Start your day with great deals!"

Afternoon: "Good afternoon! Check out our latest arrivals!"

Evening: "Good evening! Unwind with our exclusive offers!"
