# Assignment-1

Task-1:

List of Featured products on homepage. Whenever I click on the product is will redirect to product page with product details.
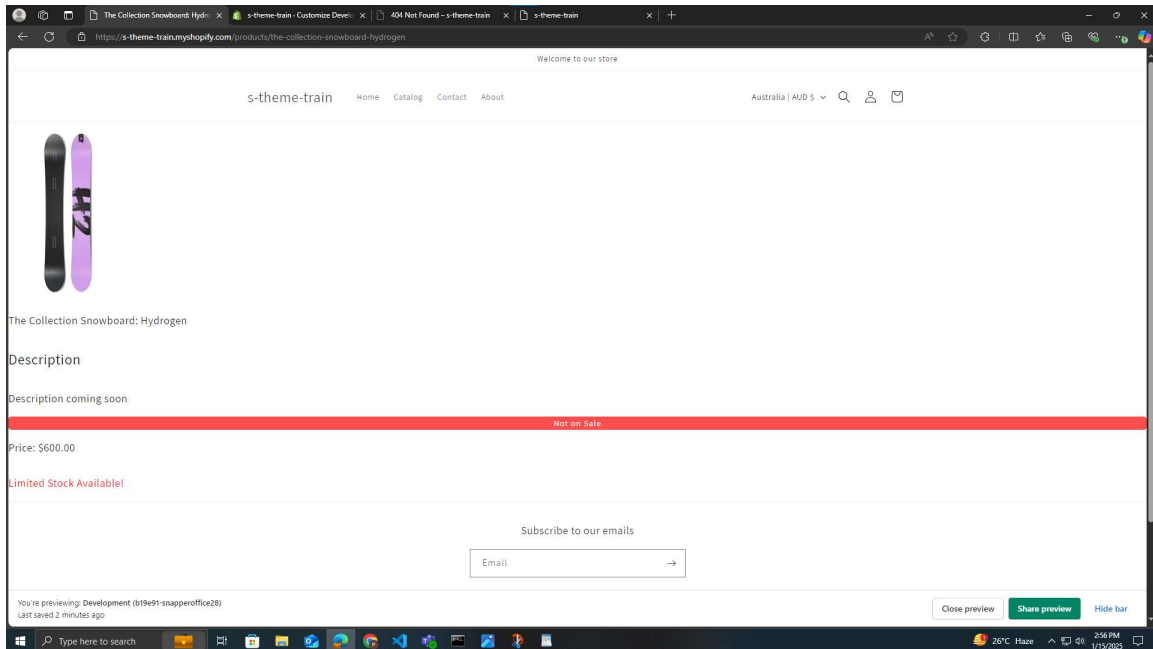

I also created a menu button "About us" when I click it will redirect to about us page "pages/about-us".
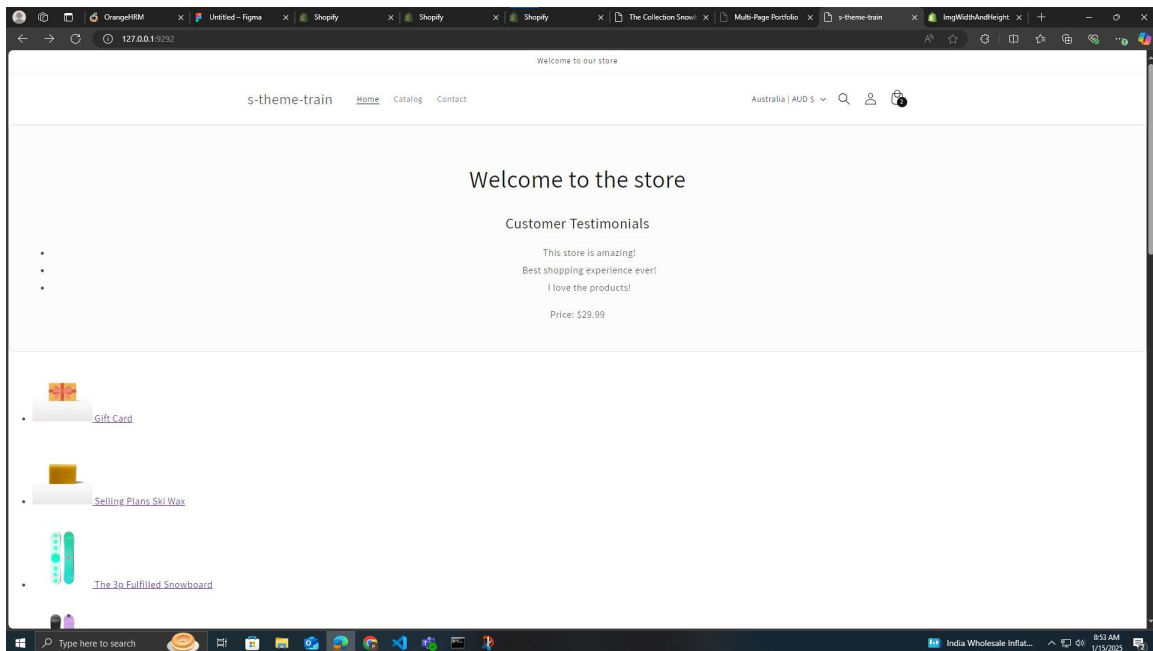

Task-2:

If there are more than 10 products, I have displayed: "We have an amazing selection of featured products!"

If there are 10 or fewer, I have displayed: "Check out our exclusive featured products!"

On the product page, I have showed "Limited Stock Available!" if the product inventory is less than 5.
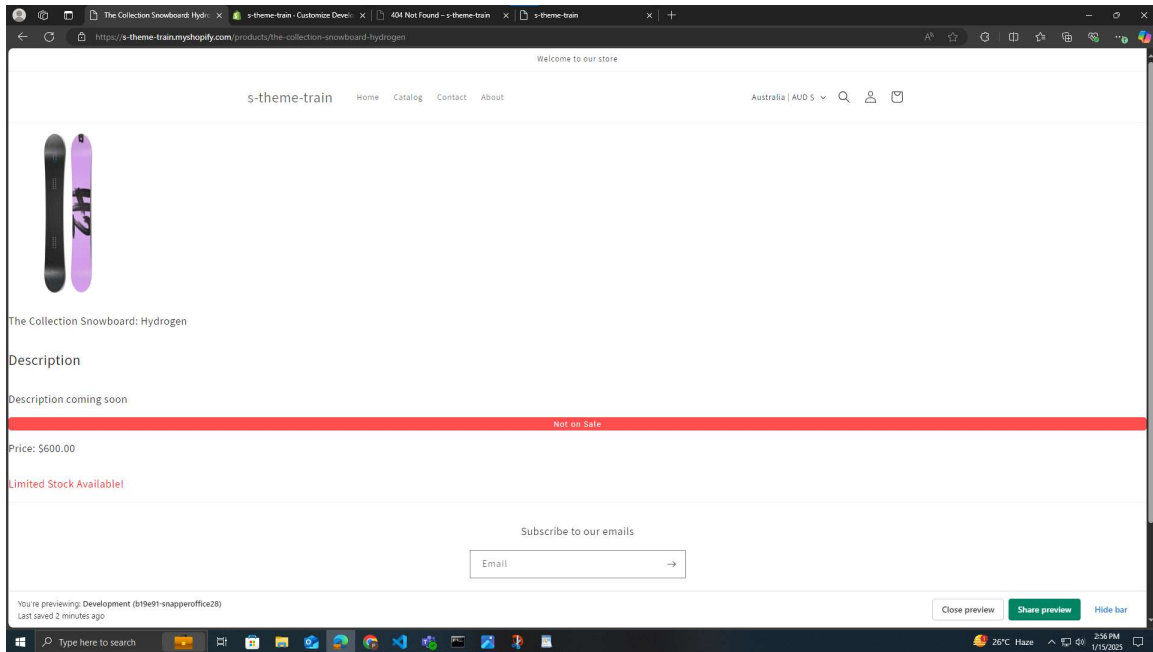

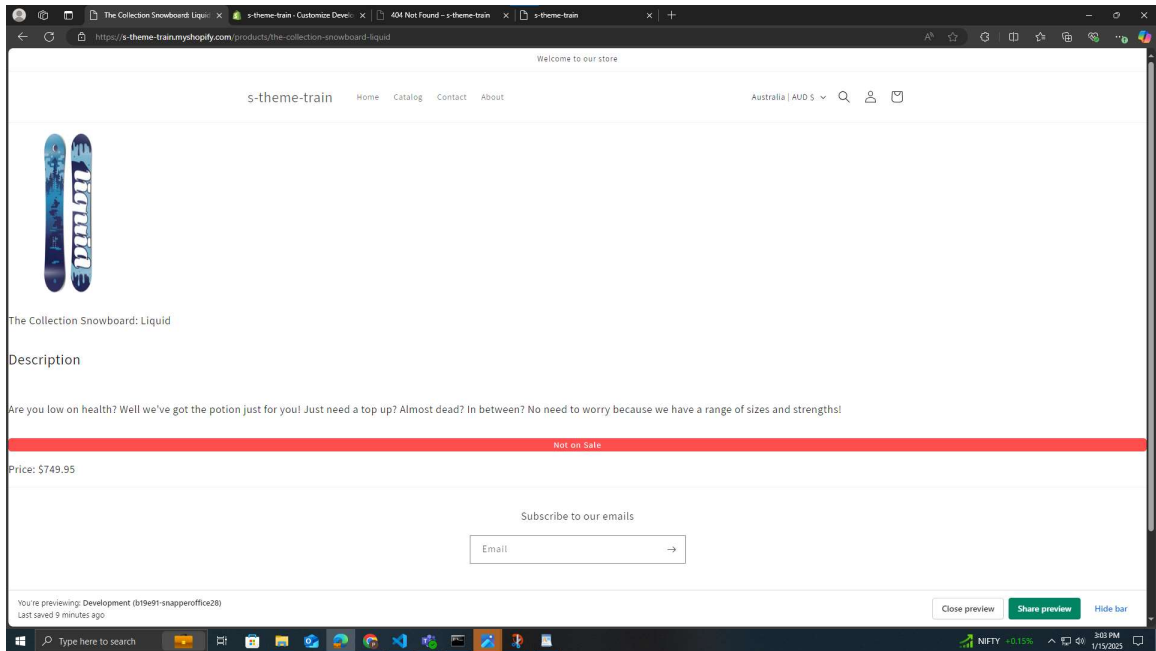

Task-3:

Created a string variable to store a welcome message and displayed it on the

homepage.created an array to list customer testimonials and displayed them dynamically. Displayed the price of a product as a number formatted to two decimal places.
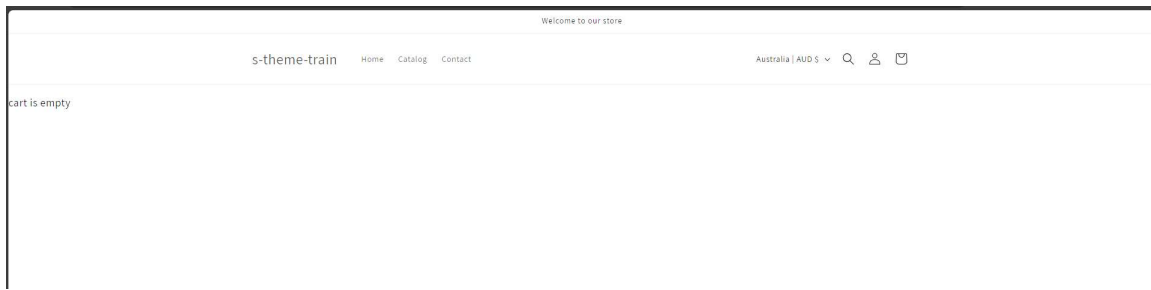

Task-4:

If there is description for the product I rendered the description, else displayed "Description coming soon"

cart is empty

If cart is empty showed a message that says "cart is empty" else displayed cart items.

Task-5:

```
ection class="practice-section">
<h1>{{ section.settings.p_text }}</h1>
<section class="homepage-message">
  {%- if customer -%}
    <p>Welcome back, {{ customer.first_name }}!</p>
  {%- else -%}
    <p>Welcome! Please log in to explore more.</p>
  {%- endif -%}
</section>

section>
```

Used {%- and -%} trimed unnecessary spaces and improve the appearance of the output
